## Job Description

### Junior & Midweight Wayfinding & UX Designers Sydney

---

#### The Position

We are looking for creative and self-motivated junior and middleweight wayfinding designers and UX designers to join our team in Sydney. This is an excellent opportunity to be part of a small team where you will be involved in a variety of projects across the built environment.

The principal responsibilities of this position will involve the development of wayfinding strategies and the implementation of these across wayfinding schemes for the built environment and their associated signage products. As part of a diverse multi-disciplinary team you will be required to collaborate with other design disciplines within the studio to develop sign designs and user experience strategies.

Our junior role would suit candidates with 1-2 years' experience, and our middleweight role for those with 3+ years' experience working in this field. Candidates must demonstrate a keen interest in working on public realm and transport infrastructure projects. This role would see the designer working with a mix of wayfinding strategists, industrial designers, graphic designers, and project architects. All the usual program knowledge required plus some user experience design knowledge would be advantageous.

#### Responsibilities

- Undertaking project research and generating reports
- Development of core wayfinding and user experience strategies
- Application of these core strategies across wayfinding and signage schemes
- Creation of wayfinding documentation and information design concepts
- Collaboration with other disciplines to coordinate the design elements with wayfinding products and architecture
- Confidence at presenting work to clients

#### Skills and Experience

- Bachelors and/or Masters degree in design related subject
- Relevant experience (junior 1-2 years; middleweight 3+ years) in established agencies
- Experience in working on transport and urban wayfinding projects alongside architects and industrial designers
- Excellent design, visual communication and conceptual thinking skills
- Experience working with design guidelines
- Great written, spoken and interpersonal communication skills
- Confidence at presenting your work and ability to manage own project timings
- Ability to work across multiple projects
- Conscientious, organised, thorough and highly detail minded
- Proactive, collaborative and work well under pressure
- Proficient in at least: Adobe Photoshop, Illustrator and InDesign
- CAD and/ or BIM skills will be highly regarded
- Fluent in English verbal and written, other languages an advantage
- Must have the right to work and reside in Australia
